

Discovery Chemistry Solutions

GVK BIO offers fully integrated and standalone chemistry solutions from hit identification, hit to lead, lead optimisation and development for pharmaceutical, biotechnology industries and academic institutions. We also cater to the research needs of fine chemicals and material science industries.

Our exceptionally strong research team consists of synthetic and analytical chemists. Our scientific talent includes more than 200 PhDs and 1000 postgraduates who have over 300 research publications from GVK BIO. They have exposure to a variety of chemistry disciplines and rich experience in a Contract Research & Development Organization environment.

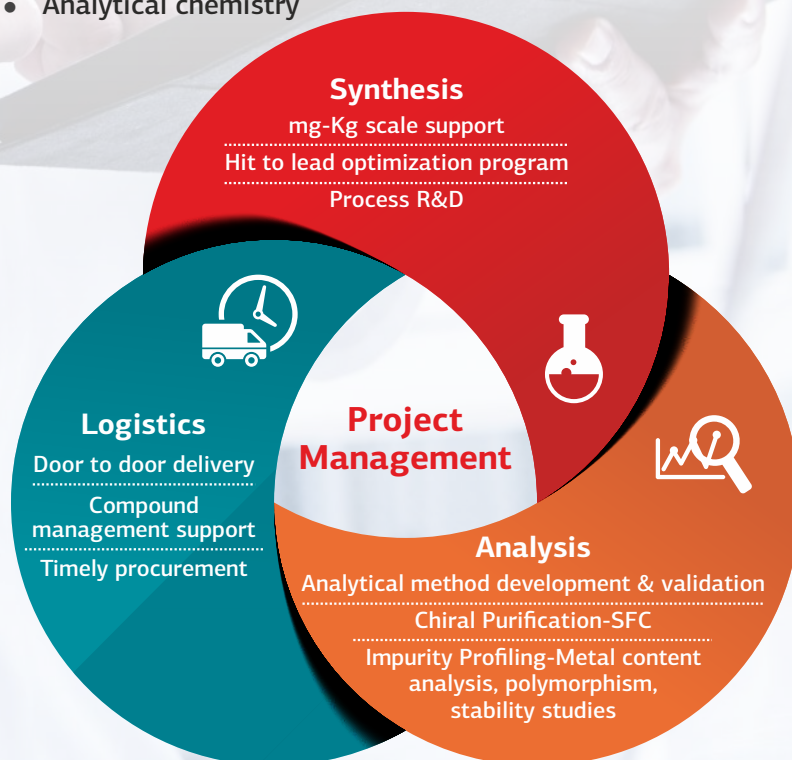

We provide innovative solutions to research problems of our customers through cost-effective approaches and adhering to their timelines. A dedicated project management team facilitates continuous improvement through process flow analysis and performance management review.

At GVK BIO, we ensure the data integrity of our customers and strive to safeguard their IP. Our EHS policies act as a guiding principle for identifying, addressing and mitigating risks that impact business continuity & sustainability. A strong supply

chain management allows us to support logistics and shipping requirements of our customers.

Our Solutions Include:

- Medicinal chemistry
- Synthetic chemistry
- Peptide chemistry
- Speciality chemistry
- Library synthesis
- Computational chemistry
- Analytical chemistry

Leading Small Molecule CRDO

Large Molecule Discovery Partner
